Using the praise function on Microsoft Teams and Yammer

On Microsoft Teams

Look for the praise icon under the chat box in Teams, you can easily recognise or thank a colleague so that other members of the Teams channel can also see it.

On Yammer

Navigate to where you would normally make an update and select ‘Praise’ rather than update.

Pick an icon from the drop down list, tag the people you would like to praise and add your message.

Alternatively watch this one minute video.
